Plywood Machine from China Professional Manufatcurer

MINGHUNG WOOD MACHINERY FACTORY

Hello friends, in this world, there are many suppliers for woodworking machine, plywood machine, and veneer machine. If you want to purchase plywood machine, how will you choose?
For let you know more about us, i will introduce our factory to you.

Our factory-Shandong MINGHUNG Wood Machinery Co.,Ltd, has produce full sets plywood machine includes veneer machine many years, from one small factory in the beginning, to be one big and professional factory in China now, with advanced production technology, professional designers and engineers, and experienced workers, good sales team and after-sales service team, we have been one strong and ability group, Our products have acquired EU CE, ISO 9001, ISO 14001, CCEP, and Energy Conservation Certification.

① LOG DEBARKER ② VENEER PEELER ③ KNIFE GRINDER

④ VENEER DRYER ⑤ GLUE SPREADER ⑥ COLD PRESS MACHINE

⑦ HOT PRESS ⑧ SAW MACHINE ⑨ SANDING MACHINE

Machine we produce: **wood log debarker, veneer peeling machine, vacuum veneer stacker, veneer dryer machine, veneer roller dryer machine, face veneer mesh dryer machine, glue spreader, plywood veneer paving machine/assembly line/lay out machine, core composer, cold press for plywood, hot press machine for**

plywood, plywood edge cutting saw/trimming saw/dd saw/circular saw, plywood sanding machine.
From the beginning processing wood, to the end product plywood, we manufacture this full line plywood production machinery.

Our company integrates design, research and development, production and sales, and works closely with China's advanced scientific research institutions. We have a strong research and development team, at present, our machinery has won a number of national patents.
Pay more attention to machine details, details determine sucess or failure, so we continuous improve and optimize machines' performance, strictly control each production step, using advanced lathe processing machine, and through many times inspections, make sure our machine accurate and durable.

For example, the **hot press machine**, it is one necessary press machine for making plywood, our hot press machine use **International standard steel plate**, strong and thick; the **hot platen** use 42mm or 52mm, be processed by large lathe, make the surface is smooth, with sufficient strength and stiffness. It does not deform at high temperatures, and the temperature and heat are uniform. This makes the plywood heated evenly, the surface is flat, and the thermal efficiency is high, which improves the production efficiency; The **oil cylinder** is treated with anti-rust, alloy casting, high hardness, scratch resistance, suitable for high-strength operations, and uses a good oil seal to prevent leakage, ensure the pressure in the oil cylinder, and good performance; **Hydraulic station** is one important part for press machine, Our hydraulic station be designed by our engineer, reasonable design of hydraulic system, save energy, all hydraulic components are arranged reasonably, neatly and beautifully placed, and the components like electromagnetic valve, hydraulic pump all use good one.
All these details make sure our plywood hot press heavy duty and very good quality, make sure pressing plywood very nice.

The **veneer peeling machine**, it is necessary for producing wood veneer, and wood veneer is the material for making plywood. So veneer quality also affect plywood quality. Therefore, veneer peeling lathe is very important too.
Our wood veneer peeling machine using double driving structure, make veneer surface smooth; the bottom is one solid and whole steel plate, make sure veneer machine is very strong and stable; the screw pitch of feed screw is very small, this make sure veneer thickness very accurate; the total power is very big for easy peel kinds of hardwood like birch beech.
We have confidence that can offer you very good quality veneer peeling machine.

Scientific and technological innovation oriented, quality-based, service supremacy, we offer full complete range of plywood production solution and technology support for our customers. Yet our machines have been exported more than 30 countries and

regions like Russia, Poland, Ukraine, Portugal, Bulgaria, Romania, Turkey, Egypt, Morocco, Indonesia, etc, and get good feedback.

Our company advantages and difference compare with other suppliers:

No 1. Sales Person

Our sales person participate in this whole process, from offer clients information, follow up the order, to the end product. And they ever worked in different post in workshop, familiar and master every production step of machine, make sure offer the most suitable machine to you.

No 2. Matrial

Our experienced purchase manager choose the good machine material and spare parts after compare different suppliers,

No 3. Engineer

Our engineer service domestic and abroad clients more than ten years, from clients start build factory, plant layout, machine maintain, etc, offer all-sided support, this is a real engineer. The most important thing is: their serious and responsibility attitude is the main source for improving and optimizing our machine.

No 4. Processing Lathe

Our processing lathe make sure machine accurate, we have invested $3000000 for cnc lathe, precise cutter, welding machine, PLC test system, Machine test system and other machines, It reduces the intensity of workers' work, improve machine parts accuracy. this is the big weapon for us to competitive with other suppliers.

No 5. Multiple inspection procedures

The whole production step, will through more than 5 times detection to make sure machine production is good. And after finish production, our engineer will test machine to ensure it is in good conditions.

No 6. Factory Management

Our company and workshop use 5S (Seiri and Seiton, Clean-up and Removal, Attainment), the application of 5S make us become one international company, keep up with the world's top 500 companies.

No 7. Warranty

Offer two years warranty for our clients, because we have 100% confidence for our machine quality. One time cooperation, lifetime friends.

We spare no effort to make every our client's factory be our exhibition hall, do excellent project.

No 8. Our Company Value

Continuous create much more value for clients.

Our team has dreams, and everyone is sincere and virtuous, so what we want is do our best satisfy every our customers, do our best offer them good plywood machine, help their business become better and better.

If you have any demands of plywood machine, please tell us, we will offer the most suitable plywood machine according to your conditions and needs. We believe our machine will help you create much benefits.
